Research | Stem Expert | Biochemistry | Recombinant Protein Purification | Scientific Writing | Prompt Engineering to guide AI models | In vitro Protein Refolding | Protein Chemistry | Molecular Biology | Protein Pegylation | Bio-Assay Development | Data Analysis

PROFESSIONAL SUMMARY

Ph.D. scientist and USPTO-registered Patent Agent with 30+ years of experience spanning protein chemistry, molecular biology research, biotechnology patent analytics, and AI/LLM training. Combines deep technical expertise in protein science, genomics, and pharmacology with a proven track record in NIH grant writing, peer-reviewed publications, and scientific communication. Currently building applied AI skills in prompt engineering and LLM evaluation. Seeking fully remote roles in AI training, scientific/technical writing, grant writing, or patent analytics within the biotechnology sector. Immediate Availability November 2026 up to 30 hours/week.

CORE COMPETENCIES

- AI/LLM Training & Evaluation — multimodal prompt engineering, scientific accuracy challenge, rubric writing
- Biotechnology Patent Analytics — prior art, invalidity/infringement/clearance/FTO/landscape searches; PCT/ISA evaluation
- Grant Writing & Management — Principal Investigator on 4 NIH SBIR grants (~$950K); budget management
- Scientific & Technical Writing — peer-reviewed publications, patent applications, regulatory opinions
- Protein Science — expression, refolding, purification (HPLC/FPLC), immunoassay development
- Domain Expertise — Biochemistry, Molecular Biology, Microbiology, Immunology, Genomics, Proteomics, Pharmacology, Stem Cell Biology, Nanotechnology, Bioinformatics, NGS, Gene Editing

PROFESSIONAL EXPERIENCE

AI Tutor and Trainer (Subject Matter Expert, Biology)

Micro1 (www.micro1.ai)| Remote

- Served as Ph.D.-level SME to train, challenge, and evaluate LLM responses in biology and biotechnology domains.
- Challenge reasoning ability for 8 different LLM responses for each task and evaluate accuracy of scientific responses. Write prompts that defeat LLMs.

AI Fellow & Trainer (Subject-Matter Expert, Biology)

Handshake AI — MOVE Program | Remote *Jul 2025 – Nov 2025*

- Served as Ph.D.-level SME to train, challenge, and evaluate LLM responses in biology and biotechnology domains.
- Developed multimodal prompts (text + image) to rigorously test LLM scientific reasoning and factual accuracy, focused on the domain of biology.
- Authored evaluation rubrics for systematic assessment of model outputs.

Senior Patent Analyst / Patent Analyst (Patent Scientist)

Cardinal Intellectual Property | Remote *Jul 2007 – Nov 2023*

- Conducted prior art, invalidity, infringement, clearance, and FTO searches across international biotechnology patent portfolios for 16+ years.
- Evaluated patent applications as an International Search Authority (ISA) examiner under the PCT, under contract with the USPTO.

- Produced detailed technical written opinions on patentability merit and claim scope across biochemistry, molecular biology, proteomics, bioinformatics, stem cell biology, immunology, pharmacology, next generation sequencing, and genomic editing.

Senior Scientist & Group Leader
Proteomtech Inc. | Emeryville, CA *Aug 2002 – Aug 2006*

- Led protein science R&D with focus on protein chemistry (pegylation), refolding, and purification. Enzymatic analysis using spectroscopic assays.
- Awarded Principal Investigator status on 4 NIH SBIR grants totaling ~$950,197; co-managed project budgets.
- Supervised team members, organized research meetings, and authored peer-reviewed publications and patent applications.

Scientist II
Diadexus, Inc. | South San Francisco, CA *Nov 1999 – Jul 2002*

- Conducted research in protein science, proteomics, and immunoassay development; supervised 2 FTEs.

Scientist
Roche Bioscience — Inflammatory Disease Unit | Palo Alto, CA *Feb 1996 – Oct 1999*

- Designed, optimized, and scaled protein purification procedures using HPLC/FPLC; supervised 3 FTEs.

Scientist
Khepri Pharmaceuticals | South San Francisco, CA *Feb 1995 – Dec 1995*

- Research in enzymology of cysteine proteases (e.g. cathepsin K) including protein expression and purification.

Scientist — Analytical Development
Amcell Corporation | Sunnyvale, CA *Feb 1993 – Feb 1995*

- Research in immunochemistry applications related to stem cell isolation using the CD34 biomarker.

Visiting Scientist
Dana Farber Cancer Institute & Harvard Medical School — Dept. of Pathology | Boston, MA *1990*

Freelance Science Writer & Columnist
Biotechnology & Medical Publications *1991 – 1993*

- Wrote columns and articles on scientific, medical, and biotechnology topics for industry publications.

EDUCATION

Postdoctoral Studies (1983-1989) — Molecular Biology, Microbiology & Protein Science
University of California, San Francisco (UCSF)

Ph.D., Molecular Pharmacology (1977-1983)
Harvard Medical School, Boston, MA

B.A., Biology (Molecular & Cellular), Minor in Chemistry (1971-1975)
Haverford College, Haverford, PA

CERTIFICATES & LICENSES

- USPTO Patent Agent License — Reg. No. 62,671 (April 2008, non-expiring)
- Google AI Professional Certificate — Google/Coursera/(August 2026)
- Google Prompting Essentials — Google / Coursera (February 2026)
- Python Data Structures — University of Michigan / Coursera (February 2026)
- Programming for Everybody (Python) — University of Michigan / Coursera (December 2025)
- AI for Everyone Specialization — IBM / Coursera (May 2025)

PATENTS

- US2007/0218535 A1 — Methods for Production of Recombinant alpha1-Antitrypsin (Lin & Medynski)
- WO/2007/062270 A2 — Methods for Production of Recombinant alpha1-Antitrypsin (Lin & Medynski)
- GB 2446550 A — Methods for Production of Recombinant alpha1-Antitrypsin (Lin & Medynski)
- WO/2008/054592 A2 — Methods for Production of Recombinant Plasminogen and Plasmin Polypeptides (Lin & Medynski)
- US2010/0144622 A1 — Methods for Production of Recombinant Plasminogen and Plasmin Polypeptides (Lin & Medynski)
